Reception for Young Researchers and Engineers 18:30 ~ 20:00														

OS-1 Low Temperature Application and Technology for Food and Biological Materials
 OS-2 Refrigerating System towards Low-Carbon Societies
 OS-3 Performance Evaluation of Air-conditioners, Chillers and Heat Pump Water Heaters
 OS-4 Simulation Techniques for Air-conditioners, Chillers and Heat Pump Water Heaters
 OS-5 Desiccant/Humidity Control/Open Cycle Air Conditioning
 OS-6 Refrigerators/Heat Pumps Based on Absorption, Adsorption or Chemical Reactions
 OS-7 Heat and Mass Transport Phenomena with Solid-Liquid Phase Change
 OS-8 Present Status and Future Development of Compressors
 OS-9 Technological Development in Heat Exchangers

OS-10 Thermophysical Properties of Refrigerants
 OS-11 Phenomena and Application Technology on Frost, Snow and Ice
 IS Advancement in HVAC&R Technologies in Asia
 WS-1 Trends in Development of Heat Exchangers
 WS-2 Geothermal Heat Utilization in Shallow Layer
 WS-3 Cutting-Edge Technologies for Optimization of Heat Pump System
 WS-4 Present and Future Solid State Refrigeration and Heat Pump Technologies
 WS-5 Overview of Thermally Driven Heat Pumps and Heat Storage Technologies
 SN-1 Seminar on Compressor Technology
